RESOLD LOCAL AND INTEREXCHANGE TELECOMMUNICATIONS TARIFF

SECTION 4 - DIGITAL DATA SERVICE (CONT'D.)

4.6   ISDN Basic Service and Virtual Serving Arrangement – General (Cont'd.)

       4.6.1   Service Description, (Cont'd.)

             D.   Optional Features (cont'd.)

                  5.   <u>Circuit Switched Services</u> (Voice and Data) - The following features provide additional functionality to an ISDN line:

                         a.   <u>Secondary Only Directory Number</u> - Can be used either 1) for a telephone number associated with an ISDN terminal that is used in addition to the primary directory number, or 2) for an additional directory number on a basic service capability that is used in addition to the primary directory number.

                         b.   <u>Multiline Hunt Groups</u> - Allows a Customer to establish hunt groups for voice and data calls. It also allows the Customer to stop hunting and/or make busy selected lines in the hunt group. Hunting sequence and hunt group membership will be dependent on individual directory numbers, whether voice or data. ISDN and non-ISDN lines will be allowed in the same hunt group.

                               I   <u>Stop Hunting</u> - Allows a Customer to stop the hunting sequence at the specific hunt group member that activates this feature.

                               II   <u>Make Busy</u> - Allows a Customer to make a line busy without affecting the overall sequence.
