Rate NCTS-6M (Temperature Controlled Service Transportation - Multi-Family Buildings)
Available to Customers who would otherwise qualify for sales service under Service Classification No. 6M - Temperature Controlled Service - Multi-Family Buildings.

Communications Protocol. Effective October 2012, the Company will maintain a database of contact information for all of its interruptible and temperature controlled customers and interested stakeholders (e.g., DPS Staff, ESCOs, NYSERDA and oil associations). This database will be used to provide notifications to these customers and stakeholders regarding the Company's interruptible and temperature controlled service, including: forecast temperatures, potential interruptions, and the initiation/conclusion of actual interruptions. These notifications will be sent via multiple mediums, such as telephone, electronic mail and text message. Beginning October 2012, the Company will perform an annual communications test during which interruptible and temperature controlled customers will be asked to confirm their contact information.

Annual System-Wide Test:

The Company will conduct an annual system-wide test of Customers' compliance under this Service Classification.

C. CHARACTER OF SERVICE

Interruptible or temperature controlled transportation, as determined by the Character of Service provisions of the sales service classification corresponding to the applicable NCTS rate classification indicated above, which provisions are incorporated herein by reference. Subject to the provisions of this Service Classification, the Company will transport natural gas, owned by the Customer that meets the quality specifications hereof from the Company's city gate points of receipt as described in the GTOP Manual to a specified delivery point on the Company's existing facilities at the Customer's point of service.

Service under this Service Classification Rate NCTS-5 and NCTS-6 is interruptible. In the event that the Company calls on peaking assets to supplement supply to meet high demand or for isolated distribution system reliability reasons in excess of four hours (other than for LNG plant idling or cooling or for system testing), or if the Company, at its sole discretion, determines that it is warranted to protect the reliability and safety of the system for firm Customers, the Company will interrupt service to Customers on this service classification. The Company will endeavor to provide notification (within two hours) of a scheduled interruption utilizing the Communications Protocol stated within this service classification. Upon receipt of such notice, the Customer shall curtail or discontinue use of gas as instructed by the Company (see Special Provisions).

Service under this Service Classification Rate NCTS-6 will be interrupted as contained in the Service Classification No. 6 Temperature Controlled Sales Service.

The Company shall control the dispatch of gas received for transportation. Transportation service hereunder for New Non-Core Customers shall be available only upon a Company determination that its existing delivery capacity and facilities are adequate to supply the total estimated gas requirements of its Customers receiving service under sales service classifications and to Existing Core Transportation Customers taking service under Service Classification No. 17, and to provide the transportation service required for the term of service hereunder. The Company will not be obligated to expand its facilities or construct new facilities for New Non-Core Customers seeking such service.

Issued by: Kenneth D. Daly, President, Brooklyn, NY
