SERVICE CLASSIFICATION No. 18 – Continued

F. Special Provisions – NCTS-6 (continued)
4. Company-Initiated Interruptions (continued)

Customers with Semi-Automatic Equipment

When the Company receives a report that the Central Park Temperature has reached the Designated Interruption Temperature for Customers with automatic equipment, the Company will remotely activate an alarm at the semi-automatic Customer sites notifying such Customers to manually switchover to an alternate fuel (“Company initiated interruption”). The Company will endeavor to provide Customers with advance notice of potential interruptions utilizing the Communications Protocol stated within this service classification. If the alarm was activated remotely, the Customer may manually switch back to natural gas once the Central Park Temperature reaches the Designated Resumption Temperature for Customers with semi-automatic equipment. If the Local Outside Temperature reached the Designated Interruption Temperature and the Designated Interruption Temperature had not been reached at Central Park, the Customer may manually switch back to natural gas once the Local Outside Temperature reaches the Designated Resumption Temperature.
