

RCN Telecom Services of New York, LP

Section 2

Leaf No. 49

PSC No. 4 - Telephone

Revision No. 0

Effective Date: July 1, 2012

Superseding Revision No. 0

## REGULATIONS

### 2.10 Application of Rates

The regulations set forth in this section govern the application of rates for services contained in other sections of this tariff.

The maximum rates schedule set forth in this tariff, where the symbol "Max" appears, are filed under a flexible pricing plan which establishes maximum prices, accepted by the Public Service Commission, within which changes may be made upon one day's notice to the Commission and customers. Rates and charges for services provided by the Company will be at or below the maximum ("Max") rates specified in Section 5. Current prices for all services will be specified in Addendum B to this tariff.

#### 2.10.1 Charges Based on Duration of Use

Customer traffic to end offices will be measured (i.e., recorded or assumed) by the Company at end office switches or access tandem switches. Originating and terminating calls will be measured (i.e., recorded or assumed) by the Company to determine the basis for computing chargeable access minutes. In the event the Customer message detail is not available because the Company lost or damaged tapes or experienced recording system outages, the Company will estimate the volume of lost Customer access minutes of use based on previously known values.

For originating calls over Feature Group B or D, usage measurement begins when the originating Feature Group B or D switch receives the first wink supervisory signal forwarded from the customer's point of termination.

The measurement of originating call usage ends when the originating Feature Group B or D switch receives disconnect supervision from either the originating end user's end office, indicating the originating end user has disconnected, or the customer's point of termination, whichever is recognized first by the switch.
