

RCN Telecom Services of New York, LP

PSC No. 4 - Telephone  
Effective Date: July 1, 2012Section 2  
Leaf No. 53  
Revision No. 0  
Superseding Revision No. 0REGULATIONS2.10 Application of Rates (cont'd.)2.10.3 Mileage

The mileage to be used to determine the Common Transport Facility monthly rate is calculated on the airline distance between the end office switch where the call carried by Local Transport originates or terminates and the customer's serving wire center. The V&H coordinates method is used to determine mileage. This method is set forth in Section 2.10.2.

The Common Transport Facility rate mileage rate is shown in Section 5.1.3 in terms of per mile per access minute. To determine the rate to be billed, first compute the mileage using the V&H coordinates method shown in Section 2.10.2. Should the calculation result in a fraction of a mile, always round up to the next whole mile before determining the mileage. Then multiply the mileage by the appropriate Common Transport Facility rate. The amount to be billed shall be the product of this calculation (i.e., the number of miles multiplied by the per mile rate) multiplied by the number of access minutes.
