

RCN Telecom Services of New York, LP

PSC No. 4 - Telephone  
Effective Date: July 1, 2012Section 2  
Leaf No. 12  
Revision No. 0  
Superseding Revision No. 0REGULATIONS2.3 Obligations of the Customer2.3.3 Switched Access Jurisdictional Report Requirements

- A. For Feature Group B Switched Access Service(s) for both interstate and intrastate use, the projected interstate percentage of use must be provided by the customer in a whole number to the Company. The Company will designate the number obtained by subtracting the projected interstate percentage of use from 100 (100 - projected interstate percentage = intrastate percentage) as the projected intrastate percentage of use. When a Customer orders Feature Group B Switched Access Service, the Customer shall state, in its order, the projected Percent Interstate Usage (PIU) factor for Feature Group B Switched Access Service group ordered. In addition, the projected percentage of intrastate use which is intraLATA must also be provided.

For Feature Group D Switched Access Service(s), the Company, where jurisdiction can be determined from the call detail, will determine the projected interstate percentage as follows. For originating access minutes, the projected interstate percentage will be developed on a monthly basis by end office when the Feature Group D, Switched Access Service access minutes are measured by dividing the measured interstate originating access minutes (the access minutes where the calling number is in one state and the called number is in another state) by the total originating access minutes when the call detail is adequate to determine the appropriate jurisdiction.

For terminating access minutes, there are three options. (1) Customer may provide Company with a projected PIU factor, (2) The PIU for originating access may be used, or (3) Company may use a default PIU which will be an even split of 50% interstate and 50% intrastate.

When a customer orders Feature Group D Switched Access Service, the customer shall supply a projected interstate percentage of use for each end office involved to be used in the event that originating call details are insufficient to determine the jurisdiction for the call. This percentage shall be used by the Company as the projected interstate percentage for such call detail. For purposes of developing the projected interstate percentage, the customer shall utilize the same considerations as those set forth in Section 2.3.3(B) following.
