GENERAL AND LOCAL EXCHANGE SCHEDULE

---

SECTION 3 - RATES, (CONT'D.)

(N)

3.8 Group Eight (Private Line Service) (cont'd)

3.8.2 Integrated Services Digital Network (ISDN) - Basic Rate Interface (BRI) (cont'd)

E. Rules and Regulations (Cont'd.)

8. Lines, equipment and facilities provided under this tariff will be designed by the Telephone Company to provide at least the same level of service, reliability, and quality as local exchange service in the exchanges where ISDN-BRI is offered. At a minimum, ISDN-BRI will be provided where the access line does not exceed 14 kilofeet in length from the customer's premises to the serving central office or experience a maximum loss of 34 dB as measured at the customer's premises at no additional cost to the customer. For circumstances that exceed these minimum service standards, special construction charges may be applied.
9. The Telephone Company may make changes in its telecommunications services, equipment, operations, or procedures, where such action is consistent with Part 68 of the Federal Communications Commission's Rules and Regulations. If such changes materially affect the operating characteristics or technical parameters of the service as originally ordered by the customer, adequate notice will be given in writing to allow the customer an opportunity to maintain uninterrupted service.
10. ISDN-BRI will conform with the Bellcore technical references and the American National Standards Institute standard.
11. Moves
  - a. Customer requests for moves involving a change between suitably equipped ISDN-BRI serving central offices constitutes a disconnection of service and the customer must establish a new service for that part of the service involved.
  - b. Customer moves occurring within the same ISDN serving office will not constitute a disconnection of service if the service is merely reestablished with a new loop facility. The reestablishment of service with a new loop facility will subject the customer to installations charges for each BRI.
12. Seasonal suspend or vacation service is not available in connection with ISDN-BRI.
