GENERAL AND LOCAL EXCHANGE SCHEDULE

SECTION 3 - LOCAL RATE SCHEDULE, (CONT'D.)

3.8 Group Eight (Private Line), (Cont'd.)

3.8.2 Integrated Services Digital Network (ISDN) - Basic Rate Interface Service (BRI) (Cont'd.)

C. Basic Service Components: Descriptions and Definitions, (Cont'd.)

16. Public Switched Telephone Network (PSTN) - The worldwide telephone network available to telephone subscribers in the United States. It includes local dialing scope, home LATA, intrastate, and international locations. Access to PSTN is provided via the Flat Rate and Usage Sensitive Network Components.

17. Secondary-Only Telephone Number - A CSS option that allows any telephone number, other than the primary telephone number, to be assigned to an ISDN-BRI terminal. A Secondary-Only Telephone Number does not have to be a primary telephone number at another terminal. An ISDN-BRI terminal can have one or more Secondary-Only Telephone Numbers. Each Secondary-Only Telephone Number can have multiple call appearances. A Secondary-Only Telephone Number can be shared with another ISDN-BRI terminal.

18. Usage Sensitive Network Component - Measured rate element applicable to all B-Channel CSV and CSD calls that utilize the PSTN more than 12,000 minutes per month. This rate element applies per B-Channel minute of use beyond the Company's allotted number of hours of use and provides central office switching capabilities.

D. Optional Service Components: Descriptions and Definitions

Unless otherwise noted, all Special Calling Features and Supplemental Services described in General Exchange Tariff are available with ISDN-BRI at the same rates, terms and conditions specified in that tariff section.

With subscription to an ISDN-BRI, the following options are available at the rates and charges set forth in this tariff (assuming appropriate digital telephone set(s) are used by the customer):

1. Analog Member in a Hunt Group - A feature that provides for an analog interface in an ISDN-BRI Hunt Group.
