Issued in compliance with order dated 02/16/2012 in Case 08-E-0539

Leaf: 234  
Revision: 1  
Superseding Revision: 0

## GENERAL RULES

### 24. Service Classification Riders (Available on Request) - Continued

#### RIDER P – PURCHASES OF INSTALLED CAPACITY

Applicable to SCs 5, 8, 9, 11, 12, 13, and 15  
(Subject to the provisions thereof)

##### A. Applicability

To any Full Service or Retail Access Customer taking service under the above SCs that meets the requirements of this Rider. This Rider is also available to any customer of NYPA, NYCPUS, or COWPUSA that meets the requirements of this Rider. A Customer taking service under this Rider may neither aggregate capacity from various locations nor substitute capacity from one location for another.

Subject to FERC approval of the NYISO Installed Capacity procedures for Special Case Resources (“SCR procedures”) and any modification thereof, service under this Rider will be available to a Customer who contracts with the Company in writing to provide a specified quantity of Installed Capacity, of no less than 100 kilowatts, at the direction of and for the hours specified by the NYISO under NYISO SCR procedures. The Customer’s application will specify whether the Customer will provide Installed Capacity during a period of service curtailment through Load Reduction and/or Load Delivery. The Customer’s application for service under this Rider must specify if the Customer intends to provide Installed Capacity during a period of service curtailment through operation of on-site generating equipment. Such generation equipment must be operated pursuant to General Rule 8.2 or 8.3, as applicable. Installed Capacity is to be provided in multiples of 100 kilowatts. Separate applications are required for the Winter Capability Period (November 1 through April 30) and for the Summer Capability Period (May 1 through October 31).

A Customer taking service under this Rider will be required to comply with all NYISO requirements under NYISO SCR procedures, including but not limited to (i) qualification requirements and requirements for provision of Installed Capacity, as the same may be modified from time to time, and (ii) all governmental limitations on operation of on-site generating equipment. The Company may terminate the availability of service hereunder to any Customer who fails to comply with NYISO requirements.

The Company reserves the right to exclude a generator from connecting to the Company’s primary distribution feeders when the Company deems it necessary to protect its system, facilities, or other customers. In addition, the Company may prohibit a Customer from delivering power and energy to the Company’s primary distribution feeders, or limit the amount of power and energy delivered, for operational reasons.
