## **SECTION 2 - RULES AND REGULATIONS, (CONTINUED)**

### **2.3.5 Identification and Rating of Toll VoIP-PSTN Traffic, (Continued)**

#### **D. Rating of Toll VoIP-PSTN Traffic**

The relevant Toll VoIP-PSTN Access Traffic identified in accordance with this tariff| section will be billed at rates equal to the Company's applicable tariffed switched access rates as specified in Section 4.5 of this tariff. |

#### **E. Calculation and Application of Percent-VoIP-Usage Factor**

For the Customer that selects Option 1 - Self Reporting, the Company will determine the number of relevant VoIP PSTN Traffic minutes of use ("MOU") to which interstate rates will be applied under subsection D, above, by applying a Percent VoIP Usage ("PVU") factor to the total intrastate access MOU exchanged between a the Company and the Customer. By default, the effective PVU will be equal to the total number of incumbent LEC and non-incumbent LEC VoIP subscriptions in the State divided by the sum of those reported VoIP subscriptions plus incumbent LEC and non-incumbent LEC switched Local Competition Report, as released periodically. If the Customer proposes to use a different PVU, it must be derived and applied as follows:

1. The Customer will calculate and furnish to the Company a factor (the "PVU-A") representing the whole number percentage of the total access MOU that the Customer exchanges with the Company in the State, that (a) is sent to the Company and that originated in IP format; or (b) is received from the Company and terminated in IP format. This PVU-A shall be based on information that is verifiable by the Company such as traffic studies, actual call detail, or other relevant and verifiable information.
