NEW YORK METROPOLITAN LOCAL AND TRANSPORT AREA

V. PERSONAL UNLIMITED PLAN (Cont'd)2. Regulations (Cont'd)

- g. Where sufficient data exists, the monthly rate for the Personal Unlimited Plan will be based on the customer's historical usage during an extraction period. An extraction period consists of at least three billed months selected by the Company and shown on the Rate Attachment. The extraction period for Home Region/Bands A-D and interregion/intraLATA message toll is also shown on the Rate Attachment. For a multiline account, the highest usage-based (i.e., non-default) rate will be used as the rate for each line with usage in the account.

3. Rate Development

- a. A customer's rate is developed in two portions: (1) Interregion/IntraLATA Message Toll and (2) Home Region/Bands A-D.

(1) Interregion/IntraLATA Message Toll: A customer with positive interregion/IntraLATA Message Toll usage for at least three months of the company's extraction period will be assigned an Interregion/IntraLATA Message Toll component equal to the average of the positive months of interregion/IntraLATA Message Toll usage plus a premium.

(2) Home Region/Bands A-D: A customer with at least three months positive billed usage will be assigned a usage-based rate equal to the average of the positive months.

However, a customer assigned a default Interregion/IntraLATA Message Toll rate will be assigned a default Bands A-D/Home Region Rate. A customer with less than three months of billed positive Bands A-D/Home Region usage will also be assigned the Bands A-D/Home Region default rate.

- b. A customer whose interregion/IntraLATA Message Toll usage rate is exactly equal to the default rate may be rounded down in order to uniquely identify default rate customers.
- c. Customers migrating to the Personal Unlimited Plan from the Personalized Rate Plan (PRP) with an Average Rate Per Minute (ARPM) that is less than \$0.031 per minute, will be recalculated based on the Billed Telephone Number's (BTN's) regional toll minutes or fraction thereof on the PRP during the customer's bill periods of October 1999 through December 1999 multiplied by the price per minute or fraction thereof which is \$0.035. For example, average monthly customer regional toll minutes \$0.035 per billed regional toll minute equals the new rate.

Customers migrating to the Personalized Unlimited Plan from the Personalized Rate Plan (PRP) with an Average Rate Per Minute (ARPM) greater than \$0.031 per minute will be recalculated based on Section 1, Paragraphs V.6(1) and V.6.(2) following.

(C)
