I. CABLE AND WIRE FACILITIES FOR POLICE DEPARTMENT EMERGENCY CALL BOX TELEPHONES

1. General

Special cable and wire facilities required for the connection of PBX station lines extending from New York City Police Department switchboards to emergency call box telephones on parkways, expressways, bridges and tunnels are furnished, installed and serviced subject to the following regulations and charges

2. Regulations

The New York City Police Department is responsible for the furnishing of conduit between the emergency call box telephone and the point of connection of the special cable and wire facilities with the Telephone Company's general distributing system. The New York City Police Department is also responsible for the furnishing and placing in such conduit of drag lines for pulling telephone cable.

Conduit utilized by the Telephone Company shall not be used by others for any purpose without the consent of the Telephone Company and the New York City Police Department.

In the event any obstructions are encountered in the conduit, the New York City Police Department is responsible for clearing such obstructions and making the conduit suitable for the placement of cable. Any repairs, replacements or rearrangements of the special cable and wire facilities made necessary because of damage caused by representatives or employees of the New York City Police Department will be made at the expense of the New York City Police Department.
