

PSC NO: 10 – Electricity
Consolidated Edison Company of New York, Inc.
Initial Effective Date: 10/25/2012
Issued in compliance with Order in Case 11-E-0299, dated 10/18/2012

Leaf: 157.3
Revision: 1
Superseding Revision: 0

GENERAL RULES

20. Standby Service - Continued

20.2 Interconnection and Operation - Continued

20.2.1 – Continued
(B)(8) – Continued

(a) Contract Demand for Each Account Supplied by the Generating Facility's Output:

The Contract Demand for each account will be determined based on the maximum potential demand on the Company's system to serve that individual account, including the delivery of supply from all sources.

(b) Billing Applicable to Each Account Supplied by the Generating Facility's Output:

(1) For purposes of this General Rule, the following definitions apply:

"Allocated As-used Generator Demand" means, for each account supplied by the generating facility's output, the demand registered on the account's meter(s) multiplied by the lower of: (a) 1 or (b) the ratio of the demand registered on the high-tension meter(s) measuring the generating facility's output to the sum of demands registered on the meters of all Standby Service accounts supplied by the generating facility's output.

"Allocated Generator Supply" means, for each account supplied by the generating facility's output, the total kilowatt-hours registered on the account's meter(s) multiplied by the lower of: (a) 1 or (b) the ratio of the total kilowatt-hours registered on the high-tension meter(s) measuring the generating facility's output to the sum of the kilowatt-hours registered on the meters of all Standby Service accounts supplied by the generating facility's output.

Allocated As-used Generator Demand and Allocated Generator Supply will be determined for each 15-minute interval. Adjustments will be made for transformation losses as applicable.
