ACCESS SERVICE

6. SWITCHED ACCESS SERVICE (Cont'd)6.3 Local Switching Optional Features (Cont'd)6.3.1 Common Switching Optional Features (Cont'd)(F) Automatic Number Identification (ANI) (Cont'd)

The seven digit ANI telephone number is available with Feature Groups B and C. With these Feature Groups, technical limitations may exist in Telephone Company switching facilities which require ANI to be provided only on a directly trunked basis. ANI will be transmitted on all calls except those originating from multiparty lines, Public Telephone Service using Feature Group B, or when an ANI failure has occurred.

The ten digit ANI telephone number is only available with Feature Group D provided with multifrequency address signaling. The ten digit ANI telephone number consists of the Number Plan Area (NPA) plus the seven digit ANI telephone number. The ten digit ANI telephone number will be transmitted on all calls except those identified as multiparty line or ANI failure, in which case only the NPA will be transmitted. In addition, an ANI charge applies as described in 6.7.1 (B) following.

When the SS7 signaling option is specified, the customer will be provided a Charge Number feature. The Charge Number is the equivalent of ANI in the CCSA/SS7 environment. The Charge Number feature is specified in 6.3.3(B) following.

With Feature Group C, ANI is provided from end offices at which Telephone Company recording for end user billing is not provided, or where it is not required, as with 800 service. It is not provided from end offices for which the Telephone Company needs to forward ANI to its recording equipment.

Where ANI cannot be provided, e.g., on calls from 4 party services, information digits will be provided to the customer.

The information digits identify: (1) telephone number is the station billing number – no special treatment required, (2) multiparty line – telephone number is a 4 party line and cannot be identified – number must be obtained via an operator or in some other manner, (3) ANI failure has occurred in the end office switch which prevents identification of calling telephone number – must be obtained by operator or in some other manner, (4) hotel/motel originated call which requires room number identification,

Issued: August 1, 2001

Effective: September 1, 2001
