B. TSP Request Process

1. Restoration

To request a TSP restoration priority assignment, a prospective TSP user must:

- a. Determine that the user's telecommunications service supports an NS/EP function under one of the following four TSP categories.
 1. National Security Leadership
 2. National Security Posture and U.S. Population Attack Warning
 3. Public Health, Safety, and Maintenance of Law and Order
 4. Public Welfare and Maintenance of National Economic Posture
- b. Identify the priority level to be requested for the telecommunications service. The priority level is determined by the end-user's TSP category and service profile. The service profile defines the user's level of support to the portion of the telecommunications service that the user owns and operates, such as customer premises equipment or wiring. The five levels of priority and seven element groups that define the service profile are contained in the Service User Manual.
