

SECTION 5 – OBSOLETE SERVICE OFFERINGS, (Cont'd.)**5.16 Business In Touch Service****5.16.1 General Description**

Business In Touch Service provides a telephone number for a business to receive toll free calls from any point within the state. The Company will provide a toll free number and a Personal Identification Number (PIN), which is a four digit security code, to the Customer. Customers share access on the same toll free access number based on PIN and, thus, may not retain use of the toll free number if service is terminated. The Company must be the Primary Interexchange Carrier on the Customer's account to subscribe to this service. The Customer may have up to 10 toll free numbers with PINs per account. The Company's PIN-Based toll free service for intrastate use is sold as an add-on to interstate PIN-Based toll free service. Charges for specialized features, monthly recurring charges, and nonrecurring charges are set forth in the Company's federal rate schedules.

5.16.2 Rates and Charges**A. Maximum***
