

PSC NO: 8 GAS
NATIONAL FUEL GAS DISTRIBUTION CORPORATION
INITIAL EFFECTIVE DATE: 03/25/10

LEAF: 265.1.1
REVISION: 0
SUPERSEDING REVISION:

SERVICE CLASSIFICATION No. 19

SUPPLIER TRANSPORTATION, BALANCING AND AGGREGATION - Continued

- (i) Supplier must maintain five (5) winter months (November - March) of primary firm capacity upstream of NFGSC sufficient to meet Supplier's extreme peak day ADDQ. Supplier shall produce proof of such contracted primary firm capacity to the Company as provided in the Procedures Manual prior to receiving service under this Rate Schedule. GUTC must have a capacity path between the point where gas is produced and the interconnection with released NFGSC capacity as described above. Alternatively, where gas is available at "liquid points," Suppliers are not required to show firm capacity upstream of such points. Acceptable "liquid points" for this purpose are identified in the Procedures Manual.
- (ii) Supplier's GUTC must include primary delivery points which coincide with Company's primary receipt rights on the NFGSC capacity retained by the Company or the Supplier's GITC.
