A. Q.Government Network Services (Cont'd)

6. Access Options

Q.Government Network Services™ Toll Service (1+Outbound) is available via three access options; switched access, dedicated access, and Qwest Calling Card (travel card access). Q.Government Network Services 800 (Inbound) is available via switched and dedicated access options.

a. Switched

Q.Government Network Services may be provisioned via Feature Group D (FGD) for switched services from the subscriber's premise through the Local Exchange Carrier's central office to the Qwest network. All long distance calls originating from, or terminating to, the Q.Government Network Services switched access locations are automatically switched to the Qwest Network. Q.Government Network Services outbound and 800 may be provisioned on the same FGD line.

b. Dedicated

Q.Government Network Services may also be provisioned via dedicated (hardware) lines from the subscriber's premise through the local central office to the Qwest network. Dedicated access to Q.Government Network Services may be provisioned by T-3, T-1, or DAL accesses.

c. Travel Card

Q.Government Network Services also offers Qwest Calling Card access by dialing a toll free number provided to the subscriber by Qwest.
