
INTEREXCHANGE TELECOMMUNICATIONS SERVICE TARIFF

13. ADVANCE COMMUNICATION SERVICE OFFERINGS

13.5 Q.GUARANTEED (Cont'd)

C. FramePlus

1. Description

- a. FramePlus frame relay service is a public, fast-packet data network offering. Customers access FramePlus at Qwest's closest Points of Presence (POPs). Within the POP, Qwest designs and installs Network Node connections on the FramePlus network. A Network Node is comprised of a Port Connection and Permanent Virtual Circuits (PVCs) that define the connections between customers' ports. Qwest dynamically allocates capacity across these logically assigned PVCs, supporting multiple customer data networks.
- b. FramePlus supports a variety of simultaneous data applications over a single integrated facility. It is optimal for applications requiring transmission between multiple locations that need high speed connectivity with low latency or delay.
