**INTEREXCHANGE TELECOMMUNICATIONS SERVICE TARIFF**

---

**2. GENERAL REGULATIONS**

**2.1. DEFINITIONS (Cont'd)**

Private Line Services

Private Line Service is an interLATA high-speed digital communications service using a physical fiber optic connection between two intrastate interLATA locations. Private Line Services are dedicated, non-switchable connections that can provide a constant and committed availability of capacity for a single customer on a transmission path only between fixed, customer-specified locations. Private Line transmission speed range from 64 kbps to 512 kbps, DS1, DS3, OC3, OC12, and OC48 speeds. OC3, OC12, and OC48 speeds are offered on an individual case basis.

Private Line circuits are priced at a fixed recurring charge based on line speed and the V&H miles between two Company POPs. The POPs are determined by locating the nearest available Company POP to the customer or end-user locations as determined by the NPA/NXX of the locations.

Service Date

The date on which Customer begins to utilize the Service or the date on which Service is made available for use by the Customer or its authorized users, whichever is sooner.
