SECTION 2 - RULES AND REGULATIONS (CONT'D.)

- 2.22 Mixed Interstate and Intrastate Switched Access Services
 - 2.22.1 When mixed Interstate and Intrastate Switched Access Service is provided, all charges, including Non-Recurring Charges, usage charges, and optional features will be prorated between Interstate and Intrastate. The percentage provided in the reports as set forth in Section 2.9.2 preceding will serve as the basis for prorating the charges. The percentage of an access Service to be charged as interstate is applied in the following manner:
 - (a) For Non-Recurring chargeable rate elements, multiply the PIU times the quantity of chargeable elements times the interstate tariff rate per element.
 - (b) For usage sensitive chargeable rate elements, multiply the PIU times actual use (measured or Company assumed average use) times the interstate rate.
 - 2.22.2 A similar calculation is then performed to determine the Intrastate portion of the bill.
 - 2.22.3 The Company will charge the Intrastate terminating Switched Access rates to Customers for those minutes lacking jurisdictional information that are in excess of a reasonable percentage (10%) of minutes for which this information is not transmitted and if the Customer's traffic pattern disagrees with or does not contain information sufficient to confirm the Customer's reported PIU. For example, if 40% of a Customer's minutes sent to the Telephone Company do not contain sufficient originating information to allow the Telephone Company to determine the originating location, the Telephone Company would apply these provisions to those minutes exceeding the 10% "floor," or 30% in this example.

Issued: October 1, 2010 Effective: October 31, 2010
