## SECTION 6 - SUPPLEMENTAL SERVICES

### 6.2 PrimeNBX Service Features (Cont'd)

#### 6.2.2 Description of Features (Cont'd)

Group Intercom: Enables a customer to terminate, using abbreviated dialing, on a member of a pre-designed group.

Hunting: Routes a call to an idle station line in a prearranged group when the called station line is busy.

Individual: Allows a station line user to add, change or delete telephone numbers for a list. The list is dedicated to the individual station line user. (8)

Intercept: Routes incoming exchange calls made to a non-working PrimeNBX Line to an announcement machine.

Intercom: Allows an electronic telephone user to directly terminate on another predesignated electronic telephone by depressing the intercom key.

Interposition Calling: Allows communication and transfer of calls between attendants.

Locked Loop Operation: Allows an attendant to hold a call on a loop. Attendant locked loop operation consists of two hold types, manual and automatic.

Lockout: Prohibits an attendant from entering a call on a held loop unless recalled by a station user or by automatic recall.

Loudspeaker Paging Access: Allows station line users to access customer-provided loudspeaker paging equipment by dialing an access code.

Management Reports: Standard printed customer management reports are delivered on a monthly basis.

Message Waiting (Lamping): Provides for the lighting of a lamp on suitably equipped customer-provided station equipment to signify a message waiting status. This is offered in lieu of stutter dial tone.

Multi-Line Hunt: Software defined search for an idle terminal within a designated group of stations. Available options include circle hunting and uniform call distribution. Each station can be assigned to only one hunt group.

Multiple Listed Directory Numbers: Permits a customer to have many listed directory numbers.
