#### GENERAL INFORMATION

#### 47. AGGREGATION OF ELECTRIC DELIVERY SERVICE (Continued)

47.3 In the event the aggregation of Electric Delivery Services is allowed under the provisions of this Rule, the customer shall be required to pay an amount to the Company equal to the book value less accumulated depreciation of any Company lines, poles and/or other facilities retired from service at that location as a result of the customer aggregating Electric Delivery Services.

47.3.1 The fee calculated in Rule 47.3 above shall be paid to the Company prior to the aggregation of Electric Delivery Services by the customer. The Company shall entertain levelized annual payments or other options that may be negotiated between the Company and the customer, subject to adequate security.

47.4 In the event that the customer's facilities have been physically altered in such a manner that requires electrical service changes according to the National Electric Code or the Company's Engineering standards, changes to the Company's service equipment or facilities may be required. The need for such changes shall be at the sole discretion of the Company in accordance with Good Utility Practice. The customer shall bear the cost of such changes and payment therefore will be in addition to the fee calculated in Rule 47.3 above.

47.5 Where existing Company equipment or facilities must be removed in order to implement aggregation, the customer shall bear the cost of removing such equipment or facilities, plus the costs to install any and all new equipment or facilities in addition to the fee calculated in Rule 47.3 above.

47.6 In order for the customer to be allowed to aggregate Electric Delivery Service under this Rule 47, the customer must not be delinquent for any receipts of undisputed bills owed to the Company.

47.7 An ESCo, as defined under Rule No. 1.26 of this Tariff Schedule, is not eligible to aggregate Electric Delivery Service under this Rule 47.

47.8 A customer is not eligible to aggregate Electric Delivery Service under this Rule No. 47 for any portion of its load served under a special contract pursuant to Service Classification No. 11 or Service Classification No. 12 except where such contract expressly permits the customer to aggregate services.

47.9 When the Company, in its sole judgment, specifically requests a physical aggregation of separate Retail Delivery Points to alleviate system or facility loading, reliability or safety problems, the customer subject to such aggregation is not responsible for charges as established in Rule Nos. 47.3 and 47.5.
