SECTION 3 – DESCRIPTION OF SWITCHED SERVICES

3.9 Grandfathered Services (continued)

3.9.5 Block of Time II¹

- (A) Block of Time II plans are outbound only long distance optional calling plans available to Residential Customers that (1) use Switched Access to reach the long distance network and (2) subscribe to the Company for the provision of interstate long distance service. Customers or End Users can access the Service by dialing 1 + the area code + the called telephone number. All calls are billed in increments of one (1) minute subject to a minimum connect time (initial period) of one (1) minute.
- (B) The optional pricing plans are established at the BTN level. The Customer may only subscribe to one block of time per BTN. If a Customer selects a different price plan for specific WTN(s), the Customer is required to establish a separate BTN for each variation.
- (C) For a specified MRC, the Customer receives a specific amount (block) of time for placing one plus (1+) Direct-Dialed intrastate and/or interstate outbound calls that originate from a line presubscribed to the Company. All usage in excess of the selected block of time will be billed at a fixed rate per minute. Any minutes not used in a billing cycle will not be carried over to the next billing cycle. No credits will be given for any unused minutes.
- (D) The block of time selected at the time the Customer's order is processed will remain in effect until cancelled or changed by the Customer. Changes to a block of time plan will be effective on the day the Customer's change order is processed. If an existing Customer initially subscribes to Block of Time II in the middle of its billing cycle, the change will be effective on the first day after the Customer's change order is processed.
