Section 3
Leaf No. 43
Revision: 0
Superseding Revision:

SECTION 3-CONNECTIONS

3.2. CONNECTIONS TO PRIVATE LINE SERVICES (Cont'd)

3.2.7 CONNECTIONS OF REGISTERED EQUIPMENT

Terminal equipment, protective circuitry, and communications systems that are registered may be connected to those Private Line Services specified in a., b. or c. following, subject to D.1. preceding and this D.2.; and further subject to C.2., "Connections of Registered Equipment", of this Section.

- A. The connection may be made only at the Customer's premises to voice grade Private Line Service (including the appropriate Group Channel Service equivalent) that present a two wire or four wire loop signaling interface for such connection under the following conditions.
1. Registered terminal equipment, registered protective circuitry, and registered key telephone systems may be connected to the station end of Private Line Services furnished in connection with off-premises stations.
 2. Registered PBX Systems may be connected, as a trunk termination, to the station end of Private Line Services furnished in connection with off-premises stations.
 3. Registered terminal equipment, registered protective circuitry, and registered key telephone systems may be connected to CCSA or EPSCS access lines.

A Foreign Exchange Service Capability Line (including its appropriate Group Channel equivalents) may be utilized with registered terminal equipment, registered protective circuitry and registered communications systems which are connected to the LEC service associated with such lines.
