Superseding Revision:

SECTION 3-CONNECTIONS

3.2. CONNECTIONS TO PRIVATE LINE SERVICES (Cont'd)

3.2.9 CONNECTIONS OF TERMINAL EQUIPMENT AND COMMUNICATIONS SYSTEMS NOT SUBJECT TO PART 68 OF THE FEDERAL COMMUNICATIONS COMMISSION'S RULES AND REGULATIONS (Cont'd)

G. Acoustic or Inductive Connections

1. General

- (a) Voice or data terminal equipment (including telephotograph equipment), communications systems or tone type address signaling may be acoustically or inductively connected at the Customer's premises to a Private Line Service provided the acoustic or inductive connection meets the following requirements:

Terminal equipment or systems may be connected at the premises of the Customer or Authorized User where the Customer has a regular and continuing requirement for the origination or termination of communications over the system provided that:

- The normal mode of operation of the system shall be to provide communications originating or terminating at the premises on which the connection is made.
- The connection shall be to channels of voice grade or less furnished by the Company.

2. Minimum Protection Criteria

Acoustic and inductive connections must meet the requirements set forth in D.4.f. preceding.
