

AT&T Communications of New York, Inc.
P.S.C. No. 25 -- Telephone
Private Line Services
Effective Date: July 21, 2010

Section 7
Leaf No. 10
Revision: 0
Superseding Revision:

SECTION 7 - ACCUNET T1.5 SERVICE

7.2 SERVICE COMPONENTS AND RATES (Cont'd)

7.2.3 Office Functions (Cont'd)

B. M-24 Multiplexing (Cont'd)

Voice grade channels derived at the central office may be connected to a switched or nonswitched voice grade service in the same or different wire center area. Digital channels derived at the central office may be connected to another digital service in the same AT&T central office. AT&T does not warrant the quality of transmission on every possible interconnection.

This office function is not required when ACCUNET T1.5 Service is connected to a Custom Network Service or a Custom 800 Service.

Customer-provided multiplexing used in conjunction with an M-24 Multiplexing office function must transmit a standard D-type formatted 1.544 Mbps signal as described in Technical Publication-PUB 43801 (see Technical Publication Information, Preface). The Customer is responsible for furnishing the signaling for the derived voice grade applications at its premises. Signaling requirements for the digital channels are described in Technical Publication-PUB 41458 (see Technical Publication Information, Preface).

	<u>USOC</u>	<u>MONTHLY</u>		<u>INSTALLATION CHARGE</u>	
		<u>Minimum*</u>	<u>Maximum</u>	<u>Minimum</u>	<u>Maximum</u>
Per M-24 Multiplexing office function	MSF24		\$312.00		\$1,642.50

* See 2.5.2 of this tariff.
