## SECTION 11 - ACCUNET SONET SERVICES

11.1 GENERAL - The AT&T Private Line Interoffice Channel SONET Services provide for the transmission of various digital signals.

11.1.1 Description - These AT&T Private Line Interoffice Channel SONET Services are configured by combining service components at designated AT&T Central Offices. The AT&T Central Offices may be within the same LATA or may be in different LATAs. AT&T Private Line SONET Interoffice Channels are furnished on a two-point basis only.

Signals at the AT&T Central Office - All signals carried by local channels or other access and presented to the AT&T central offices must meet certain signal and format constraints. These constraints are described in the following Technical Publications:

TR 54018	- Optical Interface Specifications
TR-NWT-000253	- Synchronous Optical Network Transport Systems (Bellcore)
TR 54077	- OC-12 Optical Interface Specifications
GR-253-CORE	- Synchronous Optical Network Transport Systems (Bellcore)

11.1.2 Regulations - In addition to the Regulations in Section 2, preceding, the following apply.

- A. Availability - These Services are available from the designated AT&T central offices listed in AT&T's Service Guides and may not be available in every LATA.
- B. Credit Allowances for Interruptions - For purposes of determining credit allowances in accordance with the regulations in 2.6, preceding, a Service is considered to be interrupted when:
  - there has been a loss of continuity, or
  - 300 or more seconds of transmission containing errors occur in a 15-minute period on an OC3 level, or
  - there are more than 60 severely erred seconds in a 15-minute period on an OC12 level.
- C. Connection to Other Services - Other access at various speeds may be connected to an AT&T Central Office.
