

AT&T Communications of New York, Inc.
P.S.C. No. 25 -- Telephone
Private Line Services
Effective Date: July 21, 2010

Section 9
Leaf No. 25
Revision: 0
Superseding Revision:

SECTION 9 - ACCUNET SPECTRUM OF DIGITAL SERVICES

9.2 SERVICE COMPONENTS AND RATES (Cont'd)

9.2.3 Channel Options (Cont'd)

- D. Special Routing of an ASDS - An ASDS is normally furnished using a channel selected by AT&T. Various special routing options are available for ASDS, excluding 9.6 kbps IOCs, when the required service components are available. These special routing options have associated charges in addition to other applicable charges. If complete Special Routing is not available when ordered, or if it becomes unavailable at a later date due to network rearrangements, Special Routing may only be furnished on a partial basis. The Customer will be advised before partial Special Routing is provided and may cancel the order or discontinue the special routing if the partial Special Routing is not acceptable. No cancellation charge will apply in such cases. The Customer options for special routing are:

- Diversity**
- Custom Diversity**
- Avoidance**
- Diversity and Avoidance**

Special Routing is furnished subject to the availability of channel components.

1. Diversity** - Two or more channels are furnished partially or entirely over not more than two physically separated routes. Diversity is furnished for any portion of the channel components or all channel components. If there are more than two services, the services are divided into two groups and furnished partially or entirely over two physically separated routes.

Example 1: The Customer has four IOCs between AT&T central offices A and B and specified that IOC No. 1 be diverse from IOC No. 2. Special Routing charges will apply to IOC Nos. 1 and 2. Special Routing charges will not apply to IOC Nos. 3 and 4.

- ** Diversity, Custom Diversity, Avoidance, and Diversity and Avoidance for DS0 and FT1 IOCs are discontinued as of April 14, 2010.
