

AT&T Communications of New York, Inc.  
P.S.C. No. 26 -- Telephone  
Private Line Local Channel Services  
Effective Date: July 21, 2010

Section 4  
Leaf No. 2  
Revision: 0  
Superseding Revision:

---

#### SECTION 4 - CHANNEL MILEAGE MEASUREMENT

##### 4.1 GENERAL (Cont'd)

##### 4.1.1 (Cont'd)

##### A. (Cont'd)

2. In Section 5 of AT&T Tariff F.C.C. No. 10, using the LATA number, find the AT&T central offices within the LATA. Determine the AT&T central offices within the LATA which provide the service category required.
3. In Section 7 of Tariff F.C.C. No. 10, look up the V&H coordinates for the serving wire center of each AT&T central office determined in 2 preceding.  
If the serving wire center for the AT&T central office and the Customer's premises is the same (i.e., the V&H coordinates for the wire center are the same), no calculation is necessary because no mileage charge applies. If the serving wire centers are different, proceed as in 4 following.
4. If there is only one AT&T central office in a LATA for a category of service, that central office is the pricing central office to which mileage is measured. If there are two or more AT&T central offices in a LATA for a given category of service, the AT&T central office used to determine mileage will be the one nearest to the Customer's premises. Determine which central office is the pricing central office by calculating the airline distance using the V&H coordinates of the serving wire centers of the Customer's premises and each AT&T central office (see Calculation of Airline Mileage, 4.1.3 following). If two AT&T central offices are measured equidistant from the Customer's premises using rounded mileage, the central office to be used is the one which is the nearest using unrounded mileage.
