## SECTION 2 - GENERAL REGULATIONS

### 2.5 PAYMENTS AND CHARGES (Cont'd)

#### 2.5.7 Types of Charges (Cont'd)

##### B. Nonrecurring Charges (Cont'd)

1. Installation Charge - An installation charge applies when a private line service is furnished. Installation charges are listed in the appropriate sections of this tariff (see also Change of an Order, Section 2.5.8.E and Change in Service Arrangement, Section 2.5.9.A).
2. Move Charge - A move charge applies when the physical location of the termination of an interoffice channel or of an office connection or office function is changed at the Customer's request. A move of any of these is considered to be the discontinuance of service at the old location and the reinstallation of the service at the new location. Installation charges apply only for the components that are moved. A new minimum payment period will be established.

When a component with a termination charge is moved, the Customer must pay the unexpired portion of the termination charge. A new termination charge will be established at the new location.

3. Termination Charge - A termination charge applies when a Customer orders the discontinuance of a private line service before the expiration of a specified period of time. Termination charges apply to specific components as set forth in the appropriate sections of this tariff. The charge has two elements, a dollar amount and a specified period of time. This period, expressed in months, is shown in brackets next to the dollar amount (e.g., \$10,000[120]) in the appropriate sections of this tariff. The termination charge is determined by multiplying the dollar amount by the ratio of the unexpired portion of the specified period of time. A description and example of the process for determining termination charges follows.
