

AT&T Communications of New York, Inc.
P.S.C. No. 25 -- Telephone
Private Line Services
Effective Date: July 21, 2010

Section 2
Leaf No. 10
Revision: 0
Superseding Revision:

SECTION 2 - GENERAL REGULATIONS

2.5 PAYMENTS AND CHARGES (Cont'd)

- 2.5.3 Application of Charges - The charges billed are based on the rates that are in effect in this tariff during the period that the private line service is furnished. If the rates for a period covered by a bill change after the bill has been rendered, the bill will be adjusted to reflect the new charges (see Fractional Charges and Credits, Section 2.5.10).
- A. Credit Rate Adjustment (Credit) - This credit was implemented on August 6, 1987 to temporarily limit increases due to the private line restructure to no more than 25% per circuit. This credit was determined by first calculating the billing for each circuit under the rates in AT&T Tariff P.S.C. No. 3--Telephone, in effect on August 5, 1987, and adding 25% to that amount. Then the Company calculated the billing for each circuit under AT&T Tariffs P.S.C. Nos. 25 and 26, effective August 6, 1987. The Customer was billed the lesser of the two amounts. This was accomplished by crediting the Customer for the difference (USOC XZZCR). The credit applied only to circuits billed under this tariff as of August 6, 1987. Effective April 1, 1989 the credits on ACCUNET T1.5 and DATAPHONE Digital Service circuits were eliminated. In addition, also effective April 1, 1989, billing for those private line circuits that were still receiving a credit increased up to 50% (or the amount of the credit, whichever was less). On May 23, 1990, for circuits which still have a credit remaining, the billing will increase by up to 25%. Additionally, on October 1, 1990, for circuits which still have a credit remaining, the billing will increase by up to 25%. In no case will the increase be greater than the credit. Any remaining credits will be eliminated effective April 1, 1991. In addition, the credit will be eliminated if the Customer initiates any changes to the existing circuit configuration.
- C. Rate changes initiated by the Company or activities of the Company or the local exchange companies that cause an existing circuit to be reconfigured will not impact the credit to any private line circuit unless such activities would produce a decrease in billed amount, in which case the credit will be reduced by the amount of the reduction in billing until the credit is eliminated. Once the credit is eliminated, any remaining reductions will be passed on to the Customer.
