## SECTION 7 - AT&T LOCAL EXCHANGE SERVICES - DESCRIPTIONS

### 7.24 INTEGRATED NETWORK CONNECTION SERVICE (AT&T LOCAL SERVICE ON INCS)\*

AT&T Local Service on INCS provides one of the following services: DS-1 Digital Facilities, ISDN PRI, Business Lines, or Digital Trunks over an Integrated Network Connection Service (INCS) access arrangement. Each individual customer location must be in an area where AT&T has the necessary facilities.

#### A. Provisioning

The INCS access arrangement will connect to the customer's premises via a T1 line. The customer must provide compatible customer premise equipment (CPE), and interfaces to support the local voice line and trunk applications.

#### B. Types of Service

Types of service delivery of INCS with ABN Local services are as follows:

- 1) DS-1 Digital Facilities - delivered as 24 (twenty-four) voice grade digital Channels.
- 2) ISDN PRI - delivers current functionality, excluding the delivery of Switched Digital Service with 64 KBPS End-To-End through the network.
- 3) Digital Trunks - delivered as 8 -23 voice grade digital channels. If 24 digital channels are required, a DS-1 Digital facility must be used.
- 4) Business Lines - Delivers switched local exchange service for customers with 8-24 analog DS0 Business Line needs.

#### C. Features

All standard requirements, capabilities and feature functionality that are available for use with DS-1 Digital Facilities, ISDN PRI, Business Lines, and Digital Trunks are available for use with ABN on INCS at the rates and charges specified in the PRICE LIST.

- \* Effective May 13, 2007, Integrated Network Connection Service is not available to newly subscribed AT&T Business Network customers.
