P.S.C. No. 26 -- Telephone
Private Line Local Channel Services
Effective Date: July 21, 2010

Section 9
Leaf No. 6
Revision: 0
Superseding Revision:

SECTION 9 - DIGITAL DATA LOCAL CHANNEL SERVICES

9.2 DIGITAL DATA LOCAL CHANNEL SERVICE RATES (Cont'd)

9.2.3 Channel Options (Cont'd)

A. Special Routing (Cont'd)

1. Diversity - Two or more 56 kbps Digital Data Local Channel Services may be furnished partially or entirely over not more than two physically separated routes, subject to availability of facilities. Diversity is furnished for a portion of the local channel or for its entirety. If there are more than two local channels, the local channels are divided into two groups and furnished partially or entirely over two physically separated routes.

- a. Diversity From Another 56 kbps Local Channel Service - charges will be developed on an individual case basis as specified in 2.1.5.A of this tariff.
- b. Diversity From Other Types of Local Channel Service - charges will be developed on an individual case basis as specified in 2.1.5.A of this tariff.

- B. Secondary Channel - The Secondary Channel option provides the Customer with the capability to derive an independent, slower speed auxiliary (secondary) channel as described in Technical Reference TR-NPL-000157. The derived secondary channel operates in parallel with a primary Digital Data Local Channel without reducing the operating speed of the primary channel. For 56 kbps channels, the option may be used only in two-point configurations which do not require the installation of loop repeater equipment.
