SECTION 9 - DIGITAL DATA LOCAL CHANNEL SERVICES

9.4 SELECT SAVING PLAN (Cont'd)

9.4.3 Discontinuance of Select Savings Plan - Without Liability (Cont'd)

- C. An existing SSP service may be replaced with a new AT&T ACCUNET digital service of a higher speed, provided the replacement service, if it is ASDS, is enrolled in a SSP that has an expiration date that is equal to or later than that of the service being replaced. The installation date requested for the new ACCUNET service must be on or before the requested disconnect date of the service being replaced.
- D. A Customer may also move an existing SSP service to a different location(s) or change the AT&T point-of-presence provided that the installation date requested for the move and/or change is on or before the requested disconnect date, and both installation and disconnect requests are made concurrently. The moved and/or changed service will be subject to the time commitment remaining under the original SSP.
- E. If the Customer commits to a new twenty-four through sixty month replacement SSP with an expiration date that is 12 or more months later than the expiration date of the plan being replaced. The plan being replaced will terminate on the day preceeding the start date of the new plan. The rates for the new SSP will be determined using the rates in effect at the time the Customer commits service under the new plan.
- F. An ASDS Customer with Type 1 Digital Data Local Channel (DDLCL) access service may replace their DDLCL access service with ACCUNET Generic Digital Access (GDA) service, provided the GDA service is of equal speed. The GDA service will be subject to the time commitment remaining under the Customer's original SSP and all SSP components will be repriced and/or recalculated as specified in existing SSP regulations, concerning Customer requested additions and/or changes.
