SECTION 7 - AT&T LOCAL EXCHANGE SERVICES - DESCRIPTIONS

7.1 DESCRIPTION

7.1.1 General

AT&T Local Exchange Services provide a Customer with an analog, voice-grade telephonic communications channel that can be used to originate or terminate one call at a time. Business lines (main or additional) are provided for connection of Customer-provided key system or single-line terminal equipment such as station sets or facsimile machines to the Company's network.

AT&T Local Exchange Services also provide Customers with the option to select analog trunks, which are designed to handle high traffic volumes associated with connection to Customer provided Private Branch Exchange (PBX) equipment or capable key system. The Customer may opt to utilize business trunks for outgoing calls only (DOD), incoming calls to an attendant (One-way In Local Trunk), incoming calls without utilizing an attendant (DID) or a combination of both incoming calls to an attendant and outgoing calls (Two-way Combo-Attendant Trunk). Direct Inward Dialing (DID) service allows incoming calls to be terminated directly to an end user behind a PBX or capable key system. When DID service is ordered, direct inward dialing (DID) numbers must be purchased from the Company. AT&T Local Exchange Services are available where facilities and operating systems exist. AT&T Local Exchange Services include Touch Tone.
