SECTION 24 - AT&T SOFTWARE DEFINED NETWORK SERVICE

24.4 MILEAGE MEASUREMENTS

24.4.1 General

The mileage for AT&T Software Defined Network calls is the distance in airline miles measured between:

- A. the V&H coordinates for the rate centers associated with the originating and terminating stations (Schedule A, B and C);
- B. the V&H coordinates for the AT&T central office and the V&H coordinates for the rate center associated with a station (Schedule F); or,
- C. the V&H coordinates for the originating and terminating AT&T central offices (Schedule D, E and G).
- D. For APN numbers, mileage will be calculated from the AT&T Central Office. Originating APN calls are measured from the V&H coordinates of the originating AT&T Central Office and terminating APN's are measured from the V&H coordinates of the terminating AT&T Central Office.

24.4.2 Calculation of Airline Mileage

The V&H coordinates for the AT&T central office in New York State are specified in AT&T's Business Service Guide.
