SECTION 3 - AT&T COMMERCIAL LONG DISTANCE SERVICE

3.2 RATE DETERMINATION (Cont'd)

E. Timing of Messages

The time when connection is established, determined in accordance with the time, standard or daylight saving, legally or commonly in use at the point where the calling station is located, determines whether Rate Period 1, 2 or 3 rates apply. When the connection is established in one rate period and ends in another, the rate in effect in each rate period applies to the portion of the message occurring within that rate period. In the event that a minute of use is split between two rate periods, the rate in effect at the start of that minute applies.

On Dial Station Calls chargeable time begins when connection is established between the calling and the called party.

Chargeable time ends when the calling station "hangs up" thereby releasing the network connection. If the called station "hangs up" but the calling station does not, chargeable time ends when the network connection is released by automatic timing equipment in the telecommunications network.

F. Computing of Charges

If the computed charges for a call include a fraction of a cent, the fractional amount is dropped.

G. Directory Assistance Charges

Directory Assistance Charges apply as specified in AT&T Tariff P.S.C. No. 23, Directory Assistance Service.

H. Non-Subscriber Service Charge and Usage Rates

A Non-Subscriber Service Charge applies as specified in AT&T Tariff P.S.C. No. 23.

I. Payphone Use Charge

In addition to all other charges for Custom Network Services under this tariff, a non-discountable Payphone Use Charge as specified under AT&T P.S.C. No. 22, Section 2.14, will apply.
