SECTION 6 - AT&T UNIPLAN SERVICE

6.3 ACCESS

6.3.1 General

A. Access to AT&T UniPlan Service

Access to the AT&T UniPlan Service central office is the responsibility of the Customer. A central office connection, as provided under AT&T's Business Service Guide, is required to connect access to AT&T UniPlan Service. Access may be furnished by this Company as specified in AT&T's Business Service Guide. The Customer also has the option of providing his or her own access facilities.

An access line connects a Customer premises or a Customer's private network to AT&T UniPlan Service. There are two type of access lines: Special Access and Local Exchange Service Switched Access. Special Access and Local Exchange Service Switched Access may be furnished at the same location or different locations.

1. Special Access - AT&T UniPlan Service may only be accessed via Terrestrial 1.544 Mbps Local Channels and, if required, ACCUNET[®] T1.5 Interoffice Channels. A minimum of one Customer location must be connected to AT&T UniPlan Service via Special Access at all times. At the time the Customer places the initial order for AT&T UniPlan Service, the Customer must also place an order for at least one Terrestrial 1.544 Mbps Local Channel from AT&T's Business Service Guide or from another supplier of such facilities and, if necessary, an Interoffice Channel from AT&T's Business Service Guide. In addition, the Customer's order must include the appropriate Office Connections from AT&T's Business Service Guide.
