**FORM I
CUSTOMER SERVICE AGREEMENT
FOR SERVICE CLASSIFICATION NO. 12 (Continued)**

**Attachment A
Pricing Parameters**

For the term of this Agreement, with the exception of the Contestable Load Competitive Transition Charge and the distribution delivery charge as detailed below, the rates and charges for each Billing Period shall be set according to the then effective Parent Service Classification specific to the Customer's voltage delivery level applicable to the Customer in effect at the time and as may be amended from time to time.

1. THE CONTESTABLE LOAD COMPETITIVE TRANSITION CHARGE

For each Billing Period commencing with a Contract Start Date that precedes December 31, 2011 and continues through December 31, 2011, the Contestable Load Competitive Transition Charge for Electricity Supply Service furnished by the Company to the Customer shall be determined by the then effective parent Service Classification specific to the Customer's voltage delivery level applicable to the Customer in effect at the time and as may be amended from time to time reduced by the appropriate discount percentage as specified in Service Classification No. 12

2. THE DISTRIBUTION DELIVERY CHARGE

For each Billing Period during the term of this Agreement that concludes after January 1, 2012, the distribution delivery charge shall be determined by reducing the distribution delivery rate (per kW) as provided below by the appropriate discount percentage as specified in Service Classification No. 12 for the Program. This billed delivery rate will then be multiplied by the billed kW demand to determine the distribution delivery charge.

For the term of this Agreement, the distribution delivery rate for each Billing Period shall be set according to the then effective applicable standard tariff demand charge per kW charges established in the Tariff specific to the Customer's voltage delivery level as specified in Service Classification No. ____.

As of the effective date, the distribution delivery per kW rate applicable to service furnished to the Customer is \$_____ per kW.

In the event that the Billing Period is less than twenty-five days or greater than thirty-five days, the distribution delivery charge will be pro-rated to the actual number of days in the Billing Period.

3. MINIMUM BILL PROVISIONS

The minimum bill to be rendered under this Agreement shall be priced no lower than the Company's EZR rate applicable the then effective Parent Service Classification specific to the Customer's voltage delivery level applicable to the Customer in effect at the time and as may be amended from time to time.
