

PSC NY No. 8--COMMUNICATIONS

Verizon New York Inc.

Section 11
First Revised Page 7
Superseding Original Page 7**Network Interconnection Services****11. Optional Services****11.5 Information Services and Mass Announcement (976/394 and 970/540)**

11.5.1	Description	
A.	This option allows the CLEC to deliver information services calls (976 and 394) from the CLEC's end user customers to the Telephone Company on trunk side connections ordered by the CLEC to established information services tandems.	
1.	When the CLEC delivers other information services traffic, including but not limited to calls to telephone numbers beginning with the NXX designation of 540, 550 or 970, the CLEC must subscribe to the Telephone Company's local exchange service, (e.g., measured business etc.), under the Telephone Company's PSC NY No. 1.	(T)
2.	The Telephone Company will bill the CLEC on behalf of the IP those rates associated with such calls as established by the IP. In addition, the Telephone Company local exchange service rates under the PSC NY No. 1 will apply.	(T)
B.	When the CLEC delivers calls to telephone numbers with the NXX designation of 976 or 394, the CLEC shall bill and collect the applicable rate set forth in the PSC NY No. 1 from its end users, retaining two cents per call and remitting the remainder to the Telephone Company, unless the CLEC obtains tariff approval from the PSC specifically permitting the CLEC to charge its end users a rate different than the rate set forth in the PSC NY No. 1 for these services.	(T)
1.	The CLEC shall seek such tariff approval on not less than 45 days' notice with individual written notice to all subscribers to the Telephone Company's Mass Announcement service. Upon request, the Telephone Company shall furnish the CLEC with a list of all such subscribers for this purpose. In the event the CLEC receives tariff approval from the PSC to charge a different rate, the CLEC shall pay the Telephone Company the rate set forth in the PSC NY No. 1 tariff for all 976 and 394 calls, less two cents per call. The number of calls will be determined by the Telephone Company based on recordings of completed calls at established information services tandems.	(T)
