d/b/a AT&T Long Distance Service

New York Tariff No. 3 - Telephone

Effective Date: April 3, 2011

Section 2

Leaf No. 29

Revision: 0

Superseding Revision:

SECTION 2 – RULES AND REGULATIONS

2.21 Emergency/Crisis/Disaster Restoration and Provisioning Telecommunications Service Priority, (Cont'd.)

2.21.1 General, (cont'd.)

(B) The TSP program has two components, restoration and provisioning.

- (1) A restoration priority is applied to new or existing telecommunications services to ensure restoration before any other services during a service outage. TSP restoration priorities must be requested and assigned before a service outage occurs.
- (2) A provisioning priority is obtained to facilitate priority installation of new telecommunications services during a service outage. Provisioning on a priority basis becomes necessary when an end-user has an urgent requirement for a new NS/EP service that must be installed immediately or by a specific due date that can be met only by a shorter than standard or expedited Company provisioning time frame. As a matter of general practice, existing TSP services will be restored before provisioning new TSP services.
