

BELLSOUTH LONG DISTANCE, INC.

d/b/a AT&T Long Distance Service

New York Tariff No. 3 - Telephone

Effective Date: April 3, 2011

Section 6

Leaf No. 9

Revision: 0

Superseding Revision:

SECTION 6 – COMPLEX VOICE SERVICES***6.4 Service Descriptions, (Cont'd.)****6.4.4 BellSouth® Long Distance Voice VPN**

Long Distance Voice VPN is an Advanced Intelligent Network (AIN) based voice product. It has enhanced specialized features that optimize the carrier's network to create the appearance and functionality of a private network for the Customer.

Long Distance Voice VPN offers Customers their own private company network by using an outside carrier's public network for transport. From the end user's perspective, the network appears to be Customer specific based on the features the Customer has subscribed to. The AIN architecture allows public network switches to query Service Control Points (SCPs) for instructions to process a VPN call.

BellSouth® Long Distance Voice VPN is available to complex voice Customers who presubscribe to BellSouth® Toll-Free service and/or BellSouth® Dial Direct service.

* These services have been grandfathered effective April 27, 2007. No new customers will be provisioned under this service after this date.
