SECTION 7 - PRIVATE LINE SERVICE*

7.1 Service Description, (Cont'd.)

Private Line service includes DS-0, DS-1, Fractional DS-1, DS-3 and OC-n capacity digital transmission services and may be used to transmit both voice and data communications. These services utilize dedicated access arrangements on both the Originating and Terminating ends of each circuit. Charges are billed in advance. Service is subject to the availability of facilities.

7.1.1 The Company offers the following Private Line services:

- (A) DS-0 service - a digital transmission service operating at speeds of 56 or 64 Kilobits per second (Kbps). Service can be delivered via analog or digital access (local loop) facilities
- (B) DS-1 service - a digital transmission service operating at 1.544 Megabits per second (Mbps).
- (C) DS-3 service - a digital transmission service operating at speeds of 44.736 Mbps.
- (D) OC-n service - a broadband digital transmission service.
- (E) Fractional DS-1 service: provides point-to-point (Customer premises to Customer premises) connectivity at speeds of 2 to 23 DS-0 circuits. The service is supported in 56/64 kbps increments. The Fractional DS-1 service can be delivered via DS-1, DS-3 or OC-n access.

The Company also provides Echo Cancellers as an optional feature on DS-0, DS-1 and DS-3 Private Line services. Echo Cancellers eliminate undesired signals (i.e., echoes) on long haul circuits that may experience "echoes" as a result of their distance (generally over 500 miles) and are used exclusively on voice circuits. This optional feature is provided at an additional charge.

- * This service has been grandfathered effective April 27, 2007. No new customers will be provisioned under this service after this date.
