        B.   Definitions: (Cont'd.)

                Supplier Manual: The Customer Advantage Supplier Manual dated   August 1, 1998, as the same
                may be revised, modified, amended, supplemented, clarified or superseded.
                Uniform Business Practices (UBPs) shall mean those practices set forth in the UBP Addendum,
                which are incorporated herein by reference.

                Unforced Capacity ("UCAP"): power supply resources (maximum realizable generator
                capabilities adjusted for forced outage rates, also may include special case resources) obtained by
                an ESCO/DC to meet the peak load the ESCO/DC will serve in a given Obligation Procurement
                Period.

                Unforced Capacity Losses ("UCAP Losses"): The unusable energy and associated capacity that
                results from the generation, transformation, transmission and distribution of energy to meet peak
                load.

                Unforced Capacity Reserves ("UCAP Reserves"): power supply resources (maximum realizable
                generator capabilities adjusted for forced outage rates, also may include special case resources) in
                excess of the system peak load required by the NYISO. The UCAP Reserves amount is set
                annually by the New York State Reliability Council ("NYSRC") or the NYISO.

                Voluntary Switch: A process or situation where an Eligible Customer's ESCO is changed from
                one provider to another with the customer's authorization or where an Eligible Customer returns
