GENERAL INFORMATION

40. FORM OF APPLICATION FOR UNDERGROUND SPRINKLER SERVICE UNDER SERVICE CLASSIFICATION NO. 1

UNITED WATER NEW ROCHELLE
 225 Palmer Avenue, New Rochelle, New York
 APPLICATION FOR UNDERGROUND SPRINKLER SERVICE
 UNDER SERVICE CLASSIFICATION NO. 1

TO UNITED WATER NEW ROCHELLE:

1. The Undersigned (hereinafter called the "Customer") hereby requests the Company to supply water to an underground sprinkler to be installed by the Customer in or under the lawn at premises No. _____ said underground sprinkler to be connected to the Customer's potable water piping system.
2. Attached hereto and made a part hereof is a sketch of the proposed installation showing thereon the area to be sprinkled; the size of the pipe serving the underground sprinkler system; a diagram showing the location and specifications of the double check valve used to connect the underground sprinkler to the potable water system; the volume of water required in gallons per minute required by the greatest number of heads to be operated simultaneously.
3. The furnishing of water service hereunder is subject in all respects, to the provisions of the Company's Schedule for Water Service, on file with the Public Service Commission and at the Company's offices, and to the rules, regulations, terms, and conditions therein set forth, and any amendments thereto, all of which are hereby referred to and made a part hereof. The Customer agrees to pay the rates and to comply with the terms and Special Provisions, set forth in Service Classification No. 1.
4. The Customer understands that the Company assumes no responsibility for the adequacy of the service pipe to the premises to supply the underground sprinkler system; the Company assumes no responsibility for the failure or decrease in water pressure and available volume within the premises supplied when such condition is caused by the water demand of the underground sprinkler system; and the Company assumes no obligation to increase, or permit the increase of, the service pipe to the premises to meet the increase in water requirements caused by the operation of the underground sprinkler system.
