

PSC No: 1 – Water  
UNITED WATER NEW ROCHELLE INC.  
Initial Effective Date: November 1, 2006

Leaf No. 23  
Revision: 0  
Superseding Revision:

### **GENERAL INFORMATION**

by the Customer from the property line to the building for fire service. This will allow the Company to shut off individually either one of these lines. The connection for general service shall be of a size to be approved by the Company and also subject to the approval of the proper fire insurance inspection bureau. The connection for general service shall also be made at a location where a meter can be installed by the Company. If such a connection is not made inside the building the customer shall provide suitable meter box or vault of a type and size to be approved by the Company, the meter in all instances to be set at a location where it will measure all the water used through the general service connection. The entire cost of making that part of such general service connection and the private fire service connection that is located on private property shall be borne by the Customer. Should service be discontinued by the Company for the non-payment of any bill or the violation of any rule, irrespective of whether such bill or such violation relates to the general service or to the private fire service, water shall be turned off at the connection in the street and shall not be turned on again until any delinquent bills have been paid and any irregularities have been satisfactorily adjusted and the turn-on charge as specified in Section 19 has been paid.

- (e) No water shall be taken or used through a private fire service connection for any purpose other than for extinguishing accidental fires, except for the purpose of testing fire fighting equipment, or as specified under paragraph (d). Such tests as mentioned above may be made only under special permit from the Company and the Company may require that its representative be present at such test.
- (f) Hydrants and other fixtures connected with a private fire service connection may be sealed by the Company and such seals shall be broken only in case of fire or as specially permitted by the Company and the customer must immediately notify the Company of the breaking of such seal.
- (g) Maintenance of the private fire service connection located within the street will be performed by the Company at its expense and risk.
- (h) The Company shall not in any way or under any circumstances be held liable or responsible to any party for any losses or damage resulting from fire or water or other agency which may occur due to the installation or presence of a private fire service connection or any pipe or fixture connected therewith; or for any losses or damage resulting from any leakage or other flow of water from said private fire service connection or any of the pipes or fixtures connected therewith; or for any losses or damage resulting from any excess or deficiency in pressure or supply of water due to any cause whatsoever.

Issued in compliance with the Commission Order in Case 04-W-1221 dated August 24, 2005.

Issued by: M.J. Pointing, V.P. & Gen. Mgr., 225 Palmer Ave., New Rochelle, NY 10801
