

PSC NO.: 1 TELEPHONE
Windstream New York, Inc.
Initial Effective Date: August 26, 2006

Section: 12 Leaf: 18
Revision: 0
Superseding Revision:

SECTION 12 - INTRALATA TOLL MESSAGE TELECOMMUNICATIONS SERVICE

E. WIDE AREA TELEPHONE SERVICE (Continued)

10. Service Arrangement Descriptions:

Service Arrangement B: IntraLATA usage is billed at the WATS rates set forth herein; interLATA usage is billed at other than WATS or WATS-like rates (e.g., toll-type rates) of the Interexchange Carrier providing interLATA service.

Service Arrangement C: IntraLATA usage is billed at charges for local and toll calls specified in the Company's tariffs; interLATA usage is billed at the WATS or WATS-like rates of the Interexchange Carriers providing InterLATA service.

Service Arrangement D: IntraLATA and interLATA usage is billed by the Interexchange Carrier providing the service at the Interexchange Carrier's WATS-like rates.

11. Service Groups

- a. A Service Group consists of one or more access lines, listed in 9. preceding, having the same Windstream Service Order Code (ASOC) and serving the same subscriber, or end user, at the same premise.
- b. A subscriber is limited to having one Service Group of the same type (ASOC) at the same premises.
- c. Only one ASOC may appear in the same Service Group.
- d. Each access line in a Service Group may be assigned only one ASOC.

12. Billing of Outward WATS and 800 Service Usage

Where Outward WATS and 800 Service usage is billable under the intraLATA usage rate schedule in 9. preceding, the usage charges are determined in the following manner:

- a. Determine the total hours of intraLATA usage in each Service Group.
- b. Determine the number of access lines in service in each Service Group.
- c. Determine the average usage per line in each Service Group by dividing the total hours of usage in each Service Group by the number of access lines in each Service Group. Round to the nearest hour for each Service Group.
- d. Compute the average charge per access line by Service Group by multiplying the average usage per line, as determined in c. above, by the appropriate time period charges in 9. preceding.
- e. Multiplying the average charge per access line in each Service Group by the number of access lines in each Service Group and total separately by Service Group.
