

7. APPLICATION OF RATES

7.1 Certain activities associated with the TSP System performed by the Telephone Company in compliance with Part 64.401, Appendix A of the FCC's Rules and Regulations are included in the following rate elements:

- (A) Priority Installation (Provisioning) - The act of supplying telecommunications service to a customer, including all associated transmission, wiring, and equipment if legally provided by the Telephone Company, in a period of time shorter than standard order intervals would allow. One charge applies per circuit/line/trunk per request.
- (B) Priority Restoration Level Implementation (Assignment) - The act of designating the priority level for the restoration of a particular NSEP telecommunication service. One charge applies for the initial service installation. One charge applies for each subsequent request to add circuit/line/trunk locations to an existing service.
- (C) Priority Restoration Level Change (Revision) -The act of changing the priority level assignment for an NSEP telecommunication service. This includes any extension of an existing priority level assignment to an expanded NSEP service. One nonrecurring charge applies per circuit/line/trunk per request.
- (D) Priority Restoration Administration and Maintenance - The act of administering and maintaining the TSP system in such manner that it corresponds to the National Communications System database. The monthly charge applies per circuit/line/trunk location.

7.2 Credit allowance for service interruption for Priority Restoration Maintenance and Administration shall be the same as for the service with which it is associated.
