Transition Charge ("TC", or Non-Bypassable Charge ["NBC"]):

The Transition Charge (TC) is a per kilowatt-hour charge that will recover specific generation and purchased power-related costs net of credits for the value of generation and purchased power controlled by the Company.

Fixed components of the TC include the fixed costs of RG&E owned-generation and generation related regulatory assets and allocated uncollectible costs associated with electric supply.

The remaining components of the TC will be flowed through the TC as actually incurred on a monthly basis, subject to true-up in subsequent months:

- (a) Variable costs of RG&E-owned generation,
- (b) Transmission-related costs and revenues,
- (c) The value of the output of the RG&E-owned generation,
- (d) Ancillary services (excluding Schedule 4 - Energy Imbalance) and NTAC costs will vary and be reconciled on a monthly basis,
- (e) The net value of NYPA, Nine Mile 2 and Ginna purchased power contracts. The net value will be based on the actual output and contract costs, and the actual NYISO locational market prices. The value of the NYPA power will be streamed to residential customers as required.

A Transition Charge – Variable (TCV) Statement setting forth the monthly Residential and Non-Residential Transition Charges will be filed with the Public Service Commission on not less than one (1) day's notice prior to the effective date. Such statement can be found at the end of this Schedule (PSC 19 - Electricity).
